Overview

Knowledge resources are the key for the growth of any educational institution. Maharshi Dayanand College of Arts, Science & Commerce, with its commitment to learning, provides the students with a fully equipped library consisting of books and journals on a variety of topics. There are also facilities like catalog search and issue status.

The College has continued to add to its collection, which now stands more than 34000 books; 600 CDs and DVDs, 1600 bound volumes, 8 Thesis & Dissertation & 5 Minor research projects. Besides books and journals, College faculty and students have access to a number of data and information sources that are very useful in teaching and research.

Library has been established right from the inception of the college in 1962. College Main Library is situated in a separate building at the rear of the college. Library is in three parts. Main section is having Commerce, B&I, BMM, and Computer science books. Arts & Science sections have Arts & Science books. Bound Volumes are kept in Research section. Library supports and extends the academic education of an Institution. It helps in meeting the teaching needs of the faculty and provides study facilities, educational and recreational reading.

Licences and Fair Use

License Agreements and Guidelines

The INFLIBNET Consortium subscribes to thousands of electronic journals including full-text electronic resources and bibliographic databases for its member institutions. All electronic resources available through the Consortium are governed by license agreements. The terms and conditions for using these resources are spelled out in license agreements that are signed with each publisher by the INFLIBNET Consortium on behalf of its member institutions. The licenses for electronic resources impose two types of restrictions on its usage, namely i) who can use these resources; and ii) how the resources can be used. The first restriction defines authorized users for e-resources, which generally includes students, faculty, staff and onsite visitors of a subscribing institution. The second restriction deals with how these resources can be used. It is the responsibility of individual users to ensure that e-resources are used for personal, educational and research purposes only. Most of the agreements entered into by the Consortium and publishers specify items that users are prohibited to do. Some of them are as follows:

- ❑ Systematic or programmatic downloading, retention, and printing are prohibited. For example, you cannot download entire issue of a journal or print out several copies of the same article.
- ❑ Electronic distribution of content is also restricted although the specific restrictions vary from publisher to publisher. It may be permissible to forward an article to another colleague in your own institution by email, however, transmitting an article to someone outside of the institution, or to a large group of recipients, a mailing list, or an electronic bulletin board, is not allowed.
- ❑ If you are teaching a class, you can print out a copy of an article from an electronic journal and include it in your course pack. However, do not make multiple copies for circulation. Copyright laws protect published material in any format so that it cannot be copied except in accordance with fair use. Providing access to material for educational purposes falls within the realm of fair use.
- ❑ Please ensure that the resource is used for educational and research purposes and not for commercial purposes.
- ❑ Providing electronic links on your course web pages to the Library's licensed resources is permitted but you cannot post the PDF of an article on your website. The publishers' main concern is that people outside of your campus network should not be able to access resources licensed by your institution. However, a researcher can post a pre-print of an article written by himself.
- ❑ As with any kind of scholarly communication, a researcher can use phrases or quotes from other articles and cite the source of information. However, a researcher is prohibited from using large chunk of information (paras and chapters) from an article or from a chapter in a book.

What Happens if the License is Violated?

Publishers track the use of their electronic resources in terms of number of downloads made by subscribing institution. Misuse, if any, is notified to the subscribing institution with details of kinds of violations and institution is expected to take action. The publisher also suspends the access to e-resource pending suitable action by subscribing institution. The access is stopped not only for journals where licence agreement was violated but for all journals by the same
